TACO DAO

TACO DAO is a collaboration between the best projects in the $ICP ecosystem.

***Together*, we are a community focused on defining and growing the best tokens on the Internet Computer.**

***Together*, we will onboard users and help ecosystem projects grow intelligently.**

***Together*, we reveal the power of $ICP.**

Together, we perfect the recipe.

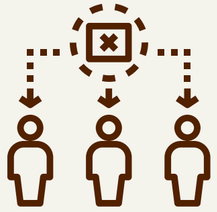
The Problem

Emotion over strategy

Retail traders buy high, sell low, and lose faith in volatile markets.

Scams and paid hype

Incentivized influencers mislead, creating echo chambers and mistrust.

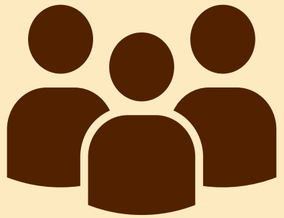


Lack of reliable research

Most tokens outside Bitcoin and Ethereum lack transparency and trustworthy information.

Crypto trading shouldn’t be a lonely gamble.

The Questions



- ***What if our eggs were in the same basket?***
- ***What if we decided <u>together</u>, who to trust?***
- ***What if we decided <u>together</u>, who to ignore?***
- ***And how much support to give each project?***

TACO DAO makes crypto trading a collective effort, distilling our shared knowledge into ***smarter***, ***safer*** *decisions.*

The Solution

TACO DAO

Selection

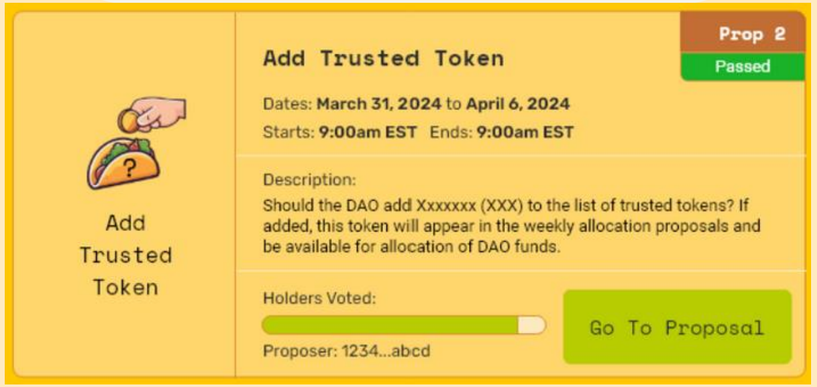
DAO members debate the merits of potential selections prior to a vote.

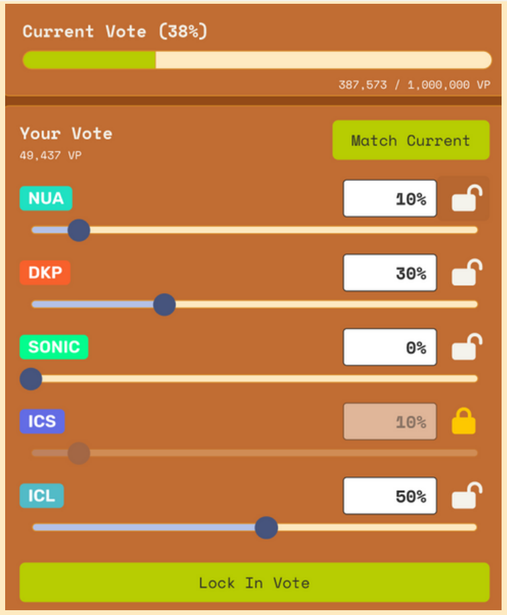
Allocation

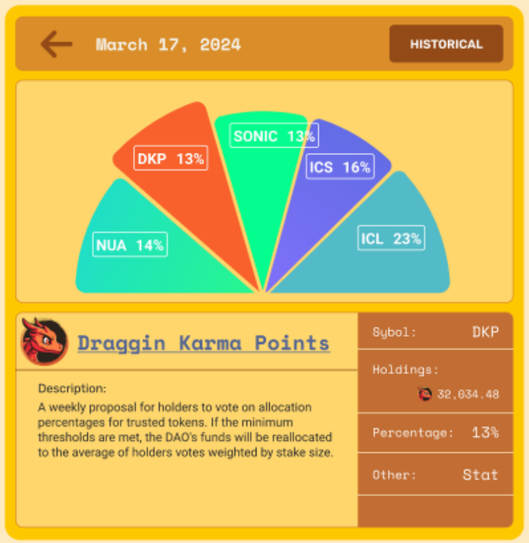
Members set the desired percentage allocation for each trusted token.

Execution

Votes become transactions. Finally, the portfolio reflects the will of the DAO.







Smart Trade Execution

Automated portfolio rebalancing guided by governance

TACO DAO

Parameters

Interval
Trades are executed at regular intervals (default: 1 min), adjustable via governance.

Amount
Trade size limits are adjustable via governance.

Pair Selection

A weighted lottery determines which trade pair is selected, giving more chances to tokens farthest from their target allocation.

Trade Execution

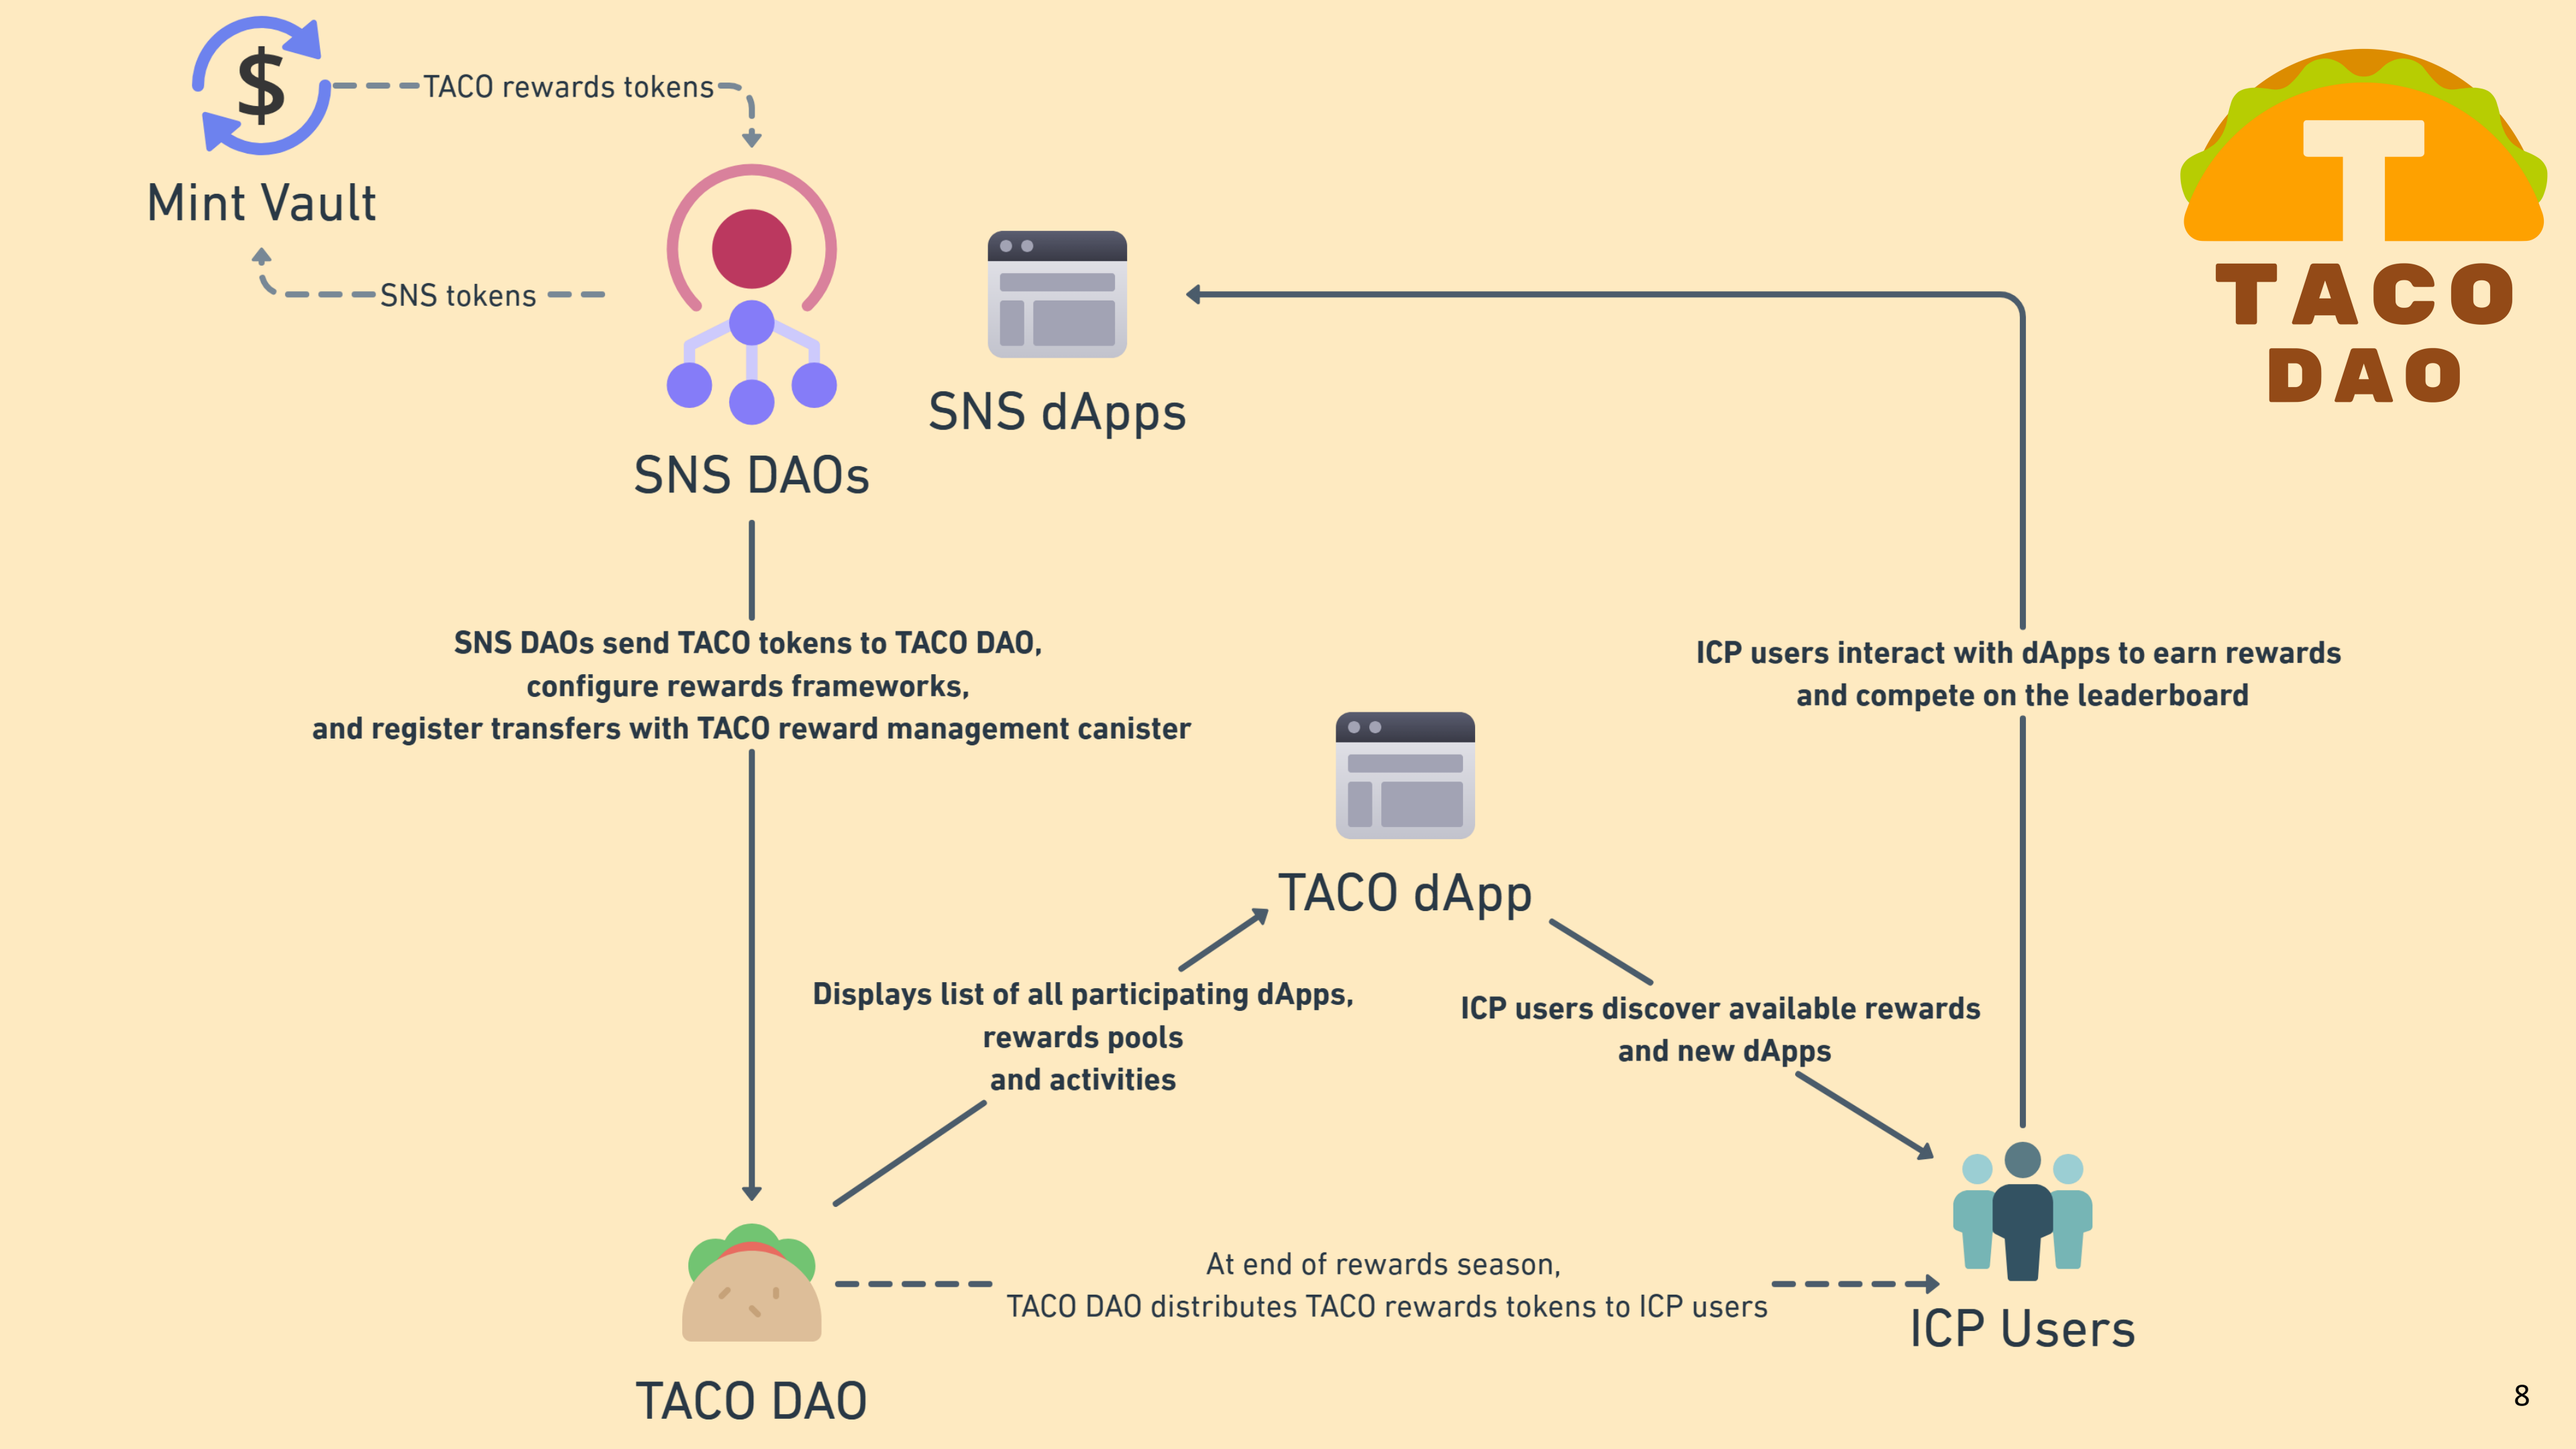
Trades are optimized by executing on ICPSwap or KongSwap, whichever offers the best rate.

Salsa Season Rewards

TACO DAO is only possible because of the incredible capabilities of the Internet Computer. But we aren't the only exciting project in the ICP ecosystem. Even in these early days, there are many others to discover.

To support the growth of these innovative dApps, the TACO Interface will host Salsa Season: a unified rewards platform that consolidates engagement incentives from multiple DAO's, making it easier than ever to explore and earn from the best of Web3.

Early participants:

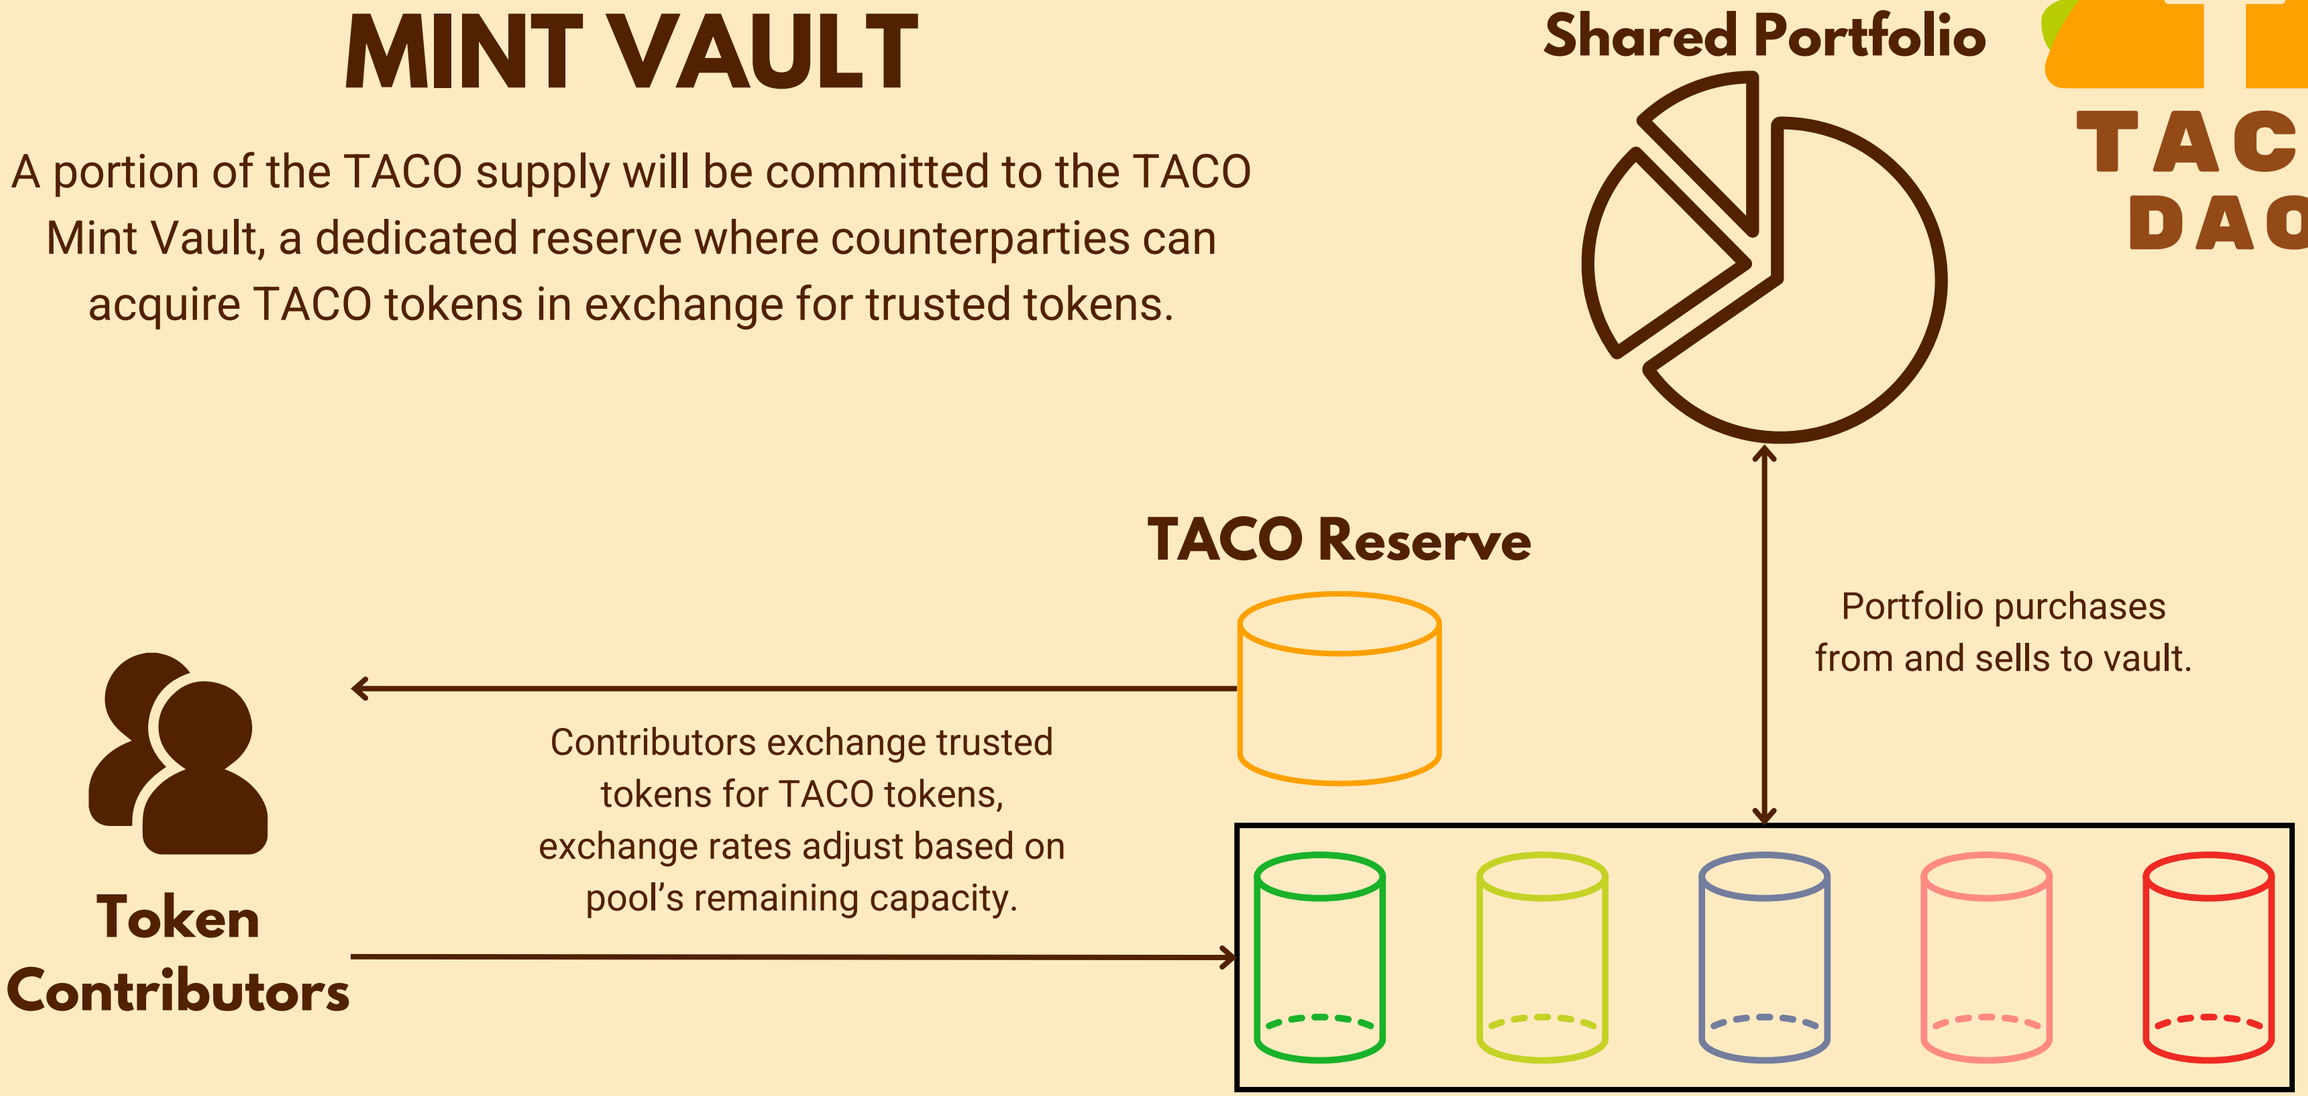


TACO rewards tokens
Mint Vault
SNS tokens
SNS DAOs
SNS dApps
TACO DAO
SNS DAOs send TACO tokens to TACO DAO,
configure rewards frameworks,
and register transfers with TACO reward management canister
ICP users interact with dApps to earn rewards
and compete on the leaderboard
TACO dApp
Displays list of all participating dApps,
rewards pools
and activities
ICP users discover available rewards
and new dApps
At end of rewards season,
TACO DAO distributes TACO rewards tokens to ICP users
TACO DAO
ICP Users

MINT VAULT

A portion of the TACO supply will be committed to the TACO Mint Vault, a dedicated reserve where counterparties can acquire TACO tokens in exchange for trusted tokens.

TACO DAO



User Onboarding

TACO DAO

Crypto Novice

Shared Portfolio: Start Here

A shared portfolio provides an easy means to gain exposure to the ICP ecosystem, even for those who are brand new to crypto!

Salsa Season: Learn More

Salsa Season incentivizes users to learn about the trusted projects in our portfolio.

TACO DEX (Coming Soon)

When users are impressed by a project, they can seamlessly click over to the TACO DEX to swap into their tokens.

Ecosystem Growth

Benefits for DAO Members

Relax

TACO is an easy way to gain exposure to the cream of ICP ecosystem. No need for extensive research or elaborate trading plans.

Be Confident

DAO members gather due diligence together when choosing trusted projects. *Together*, we avoid scams!

Stay Informed

DAO members exchange knowledge and opinions to influence portfolio allocations.

Be Diversified

The TACO portfolio offers members a diversified and adaptable asset to hold long term.

TACO DAO

Benefits for Trusted Projects

Stand Out

Being spotlighted as a trusted token gives your project credibility and positions it as a leader in the ecosystem.

Gain Feedback

Joining our portfolio sparks discussions centered around your project, offering insights to refine and improve your dApp.

Diversify

Exchange your tokens with TACO through the Mint Vault to strengthen your treasury with exposure to the ICP ecosystem.

Boost Activity

Participate in Salsa Season to drive engagement and activity on your dApp.

TACO DAO

Initial Token Distribution

TACO DAO

Total Supply: 7, 777, 777

Distributed on Genesis

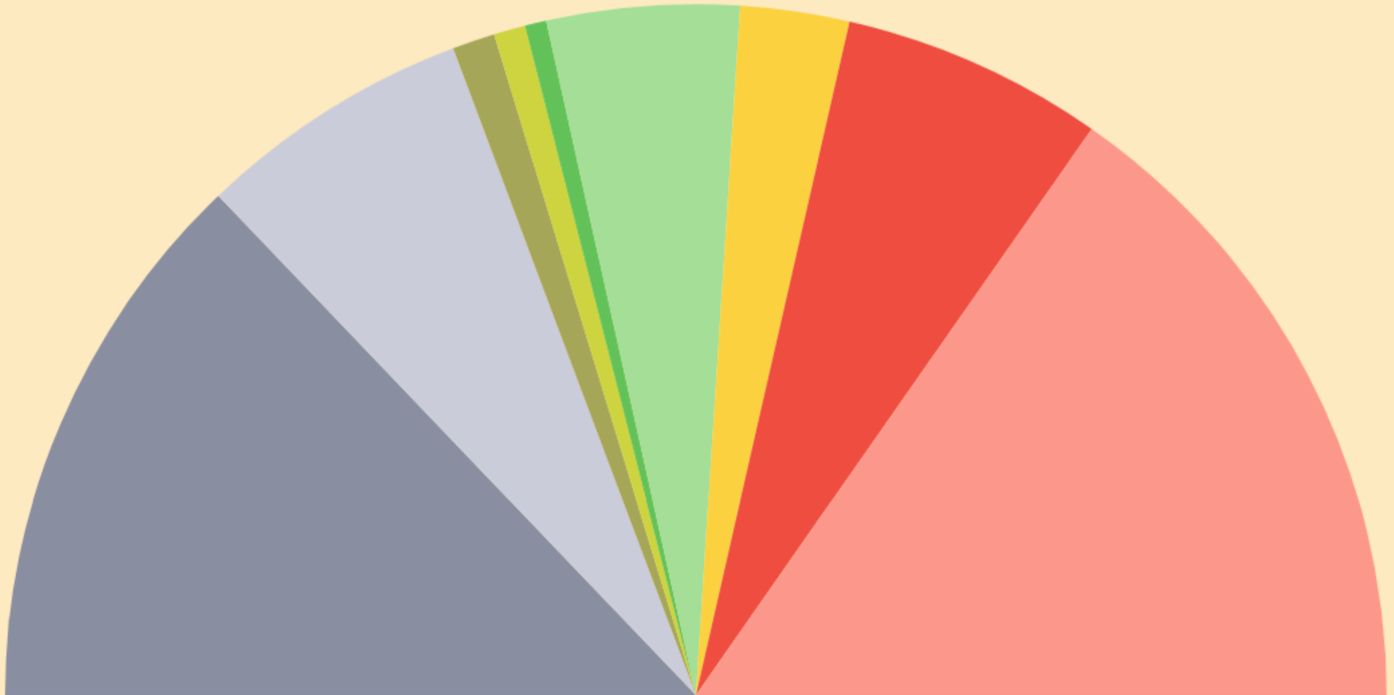
- SNS Swap 26.353%
- Front End Dev 2%
- Visual Design 1%
- Founders' Presale 12.857%
- Advisors 1.479%
- DKP Swap 9%

Held in Treasury

- Liquidity Pools 5.091%
- Future Dev 11.97%
- TACO Mint Vault 30.25%

75% of ICP Raised in our SNS SWAP goes straight into the portfolio.

25% of ICP Raised in our SNS SWAP will fund our roadmap.



TACO DAO's Mint Vault allows anyone to exchange trusted tokens directly for TACO at a fair value up to the allocation % set by the threshold.

Roadmap Items

While this list sets forth our initial direction, it remains open to modifications. The TACO DAO is not bound to pursue individual objectives in a linear fashion.

TACO DEX

Deploying the TACO OTC & Orderbook Exchange.

Redemption

Sending TACO tokens to the treasury in exchange for assets from the portfolio.

Passive Rewards Generation

Locking tokens in the NNS to generate voting rewards, providing liquidity for trusted token pairs and liquid staking for our ICP.

NFT Trading

Purchasing, owning, and selling NFTs on prominent ICP NFT marketplaces.

Cross-Chain Expansion

Including native tokens on other blockchains in the portfolio.

Re-Deployment

Deploying a framework that enables other DAOs to establish their own portfolios.
